FLYSCAN SERVICES

ADVISE | SUPERVISE | GUARD
FLYSCAN

A SOLUTION FOR ANY MISSION PROFILE...

Our comprehensive range of HUMS\(^1\) services has been built-up for you.

It features adapted packages capable to support any of your mission profiles and any organization type.

Benefit from maximum anticipation on maintenance events, made possible by the close monitoring of Airbus Helicopters HUMS experts, providing proactive and predictive analysis of monitored parameters of your helicopters.

FlyScan service packages highly contribute to maximize your operations efficiency, increasing both fleet availability and flight safety, while reducing maintenance burden.

FlyScan monitors multiple sources of Aircraft data collected through a secured cloud:

- **Vibrations**
  Dynamic components health monitoring

- **Usage**
  Flight limitations, cycles and various counters monitoring

- **Flight parameters**
  Flight data recording

- **Avionics codes**
  Flight failure surveillance

Our HUMS experts provide you early recommendations with an high level of confidence and make you benefit from AOG reduction and technical flight / warning avoidance.

FlyScan helps you to better plan and schedule your operations and maintenance activities.

\(^1\) HUMS: Health and Usage Monitoring Systems
YOU FLY
WE KEEP A WATCHFUL EYE...

If you already have an organisation in charge of HUMS monitoring, this solution is for you.

In this service, Airbus Helicopters HUMS experts permanently:

- **Check and monitor all the indicators of your helicopters**
- **Advise you in case of any event validated as abnormal**
- **Allow fast and efficient symptom treatment by your maintenance teams**

Airbus Helicopters proactive weekly feedback through review of main components, lower maintenance burden by reducing the number of AOG situations and unnecessary technical flights linked to HUMS warnings.
WE DO IT FOR YOU...

If you have not implemented any HUMS analysis team in your organization, and if you do not have the means to monitor data coming from the Aircraft, but wish to get benefits out of this clever system, use this program, it suits perfectly to your requirements.

Through this service, Airbus Helicopters will not only manage for you the various thresholds implemented, but also miscellaneous usage and failure parameters to closely monitors any event that could occur on your fleet.

Just a simple and regular data transfer to Airbus Helicopters, and we are able to propose you a deep analysis of your records.

Our expert teams:
- Get in direct contact with your maintenance teams
- Report on an agreed periodic base on any additional maintenance action
- Allow you to prevent incipient failures

HEALTH INDICATORS FOLLOW-UP & THRESHOLDS MANAGEMENT
WE’VE GOT YOU COVERED…

This service is particularly adapted to operators already managing a HUMS system.

Airbus Helicopters brings its expertise to your doorstep, and supports your teams in the daily surveillance of your fleet.

Benefit also from maximum anticipation, thanks to Airbus Helicopters proactive weekly feedback through review of the entire set of Aircraft data.

Our experts:
- Advise you in case of any event validated as abnormal
- Report on actions to be performed on the system itself, or on the helicopter
- Analyse your technical events and answer to your questions

Act on your maintenance burden, by reducing the number of AOG situations and unnecessary technical flights linked to HUMS warnings.

In this package, Airbus Helicopters puts at your disposal a specific HUMS Hotline available 24/7*, and commits to a response for an AOG within a few hours.

* Not available for H135 and H145 aircraft.
