

# H175

The H175 is setting new standards of safety and comfort and is the most competitive in its class.

The H175 sets a new standard in terms of comfort, with the largest cabin volume per seat and low vibration and sound levels whatever the speed

## OIL & GAS

Takeoff and landing at maximum weight in compliance with strictest safety standards – Performance Class 1 (PC1)

Safety: highly crash-resistant, extra-large egress windows, emergency flotation devices and life rafts

Most competitive rotorcraft for transporting between 16 and 18 passengers

Its new avionics suite and automatic pilot offer easy piloting with optimized assistance

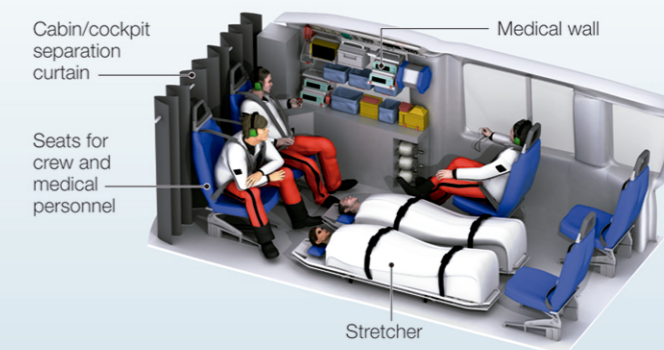

## DIMENSIONS

## PUBLIC SERVICES

### Emergency Medical Services

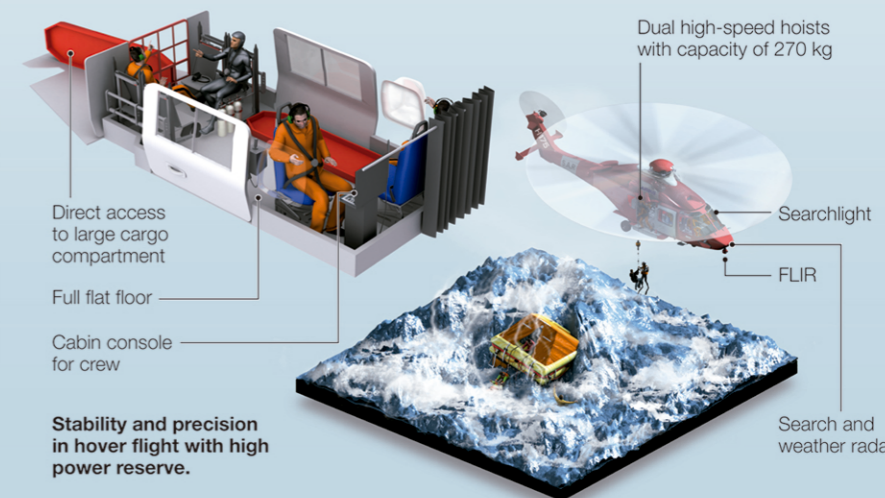

Spacious cabin with room for intensive care medical installation, while still offering free space for seats and cargo access.

The H175 can easily perform long-distance inter-hospital transfer flights.

### Search and Rescue

Capable of rescue missions up to 250 NM (463 km).

Stability and precision in hover flight with high power reserve.

## TECHNICAL DATA

- Maximum takeoff weight: **7,500 kg / 7,800 kg (end 2016)**
- Standard fuel tank capacity: **2,066 kg / 4,555 lbs (2,616 litres / 691 US gal)**
- Ferry range: **> 600 NM**
- Endurance: **6 hours**
- Maximum cruise speed: **160 kts (300 km/h)**

Within its class, the H175 offers the best operating range in relation to the number of passengers.

Objective	Passengers	Radius of action
Comfort	16	140 NM / 332 KM
Higher density	18	105 NM / 269 KM
Long range	12	235 NM / 435 KM

## PRIVATE & BUSINESS AVIATION

With the most spacious and comfortable cabin in its class, the H175 offers many configurations.

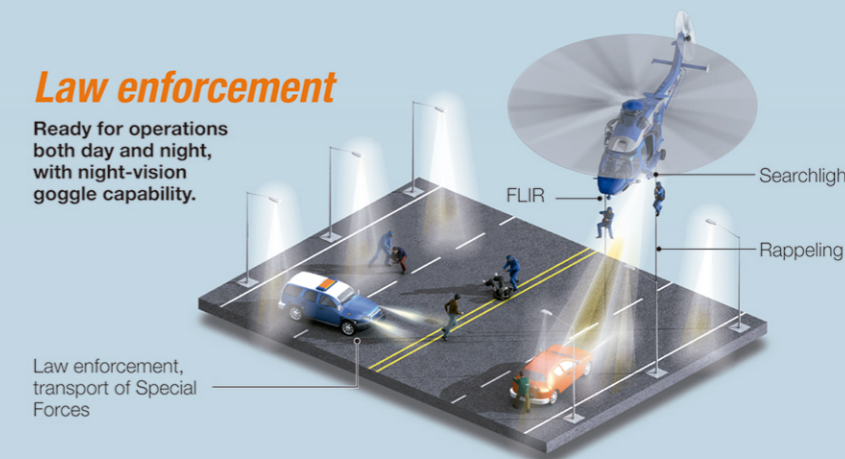

Its performance levels and quiet sound footprint permit access to landing sites almost anywhere

VIP or Executive configuration: 6 to 12 passengers

### Law enforcement

Ready for operations both day and night, with night-vision goggle capability.

Law enforcement, transport of Special Forces
