# INFINITY: Gaming module

Improve your cybersecurity skills

**AIRBUS**

# Transform your cyber training

In a world where **cyberattacks** are increasingly becoming more frequent, training has become a major challenge. Develop your cyber skills with the **Infinity module** from **Airbus's CyberRange**.

**Train** with **immersive and personalised courses** in a **gamified environment** that ensures real progress.

## Training

Animate **evolving and user-adapted training paths**, allowing them to acquire the correct cybersecurity reflexes and consolidate their skills. **Follow their progress** with performance reports.

## Exercise

Train with **operational exercises** based on CyberRange infrastructures, in **solo or team mode**. Participate in **CTF challenges**, **cyberdefence exercises**, **fight against information manipulation** and more, all within **realistic IT/OT environments**.

## Evaluation

Validate your competencies through **concrete technical assessments**, then receive a score and ranking that reflects your level.

## Create your own content!

Personalise your training by **designing your own training paths, scenarios, exercises and assessments** with the Infinity module editor.

*CyberR, the first European recruitment platform specialising in cybersecurity, evaluates the skills of its candidates using our solution!*

## A quiz to captivate your audience

Create quizzes with the InfinityQuiz module! Liven up your presentation by asking **customised questions** and **challenging your audience**.

**Add diverse questions**, adapted to your field of expertise, by using text or images.

**Launch the quiz** with a QR code that participants can scan.

**Show the podium** immediately after the quiz to recognise the winners and create a positive dynamic through competition.

## Challenges

**Join our challenges and CTFs** that we have organised for various events including:

- The **European Cyber Cup** during the Forum InCyber in Lille
- The **European Cyber Week** in Rennes
- The **DefCon** event in Las Vegas (CTF co-organised with Google)

**Over 15,000 people have already participated in one of our CTFs!**
