

AerCap orders 100 additional Airbus A320neo Family aircraft

Toulouse, France, 18 March 2026 – AerCap Holdings N.V. (“AerCap”) has signed a firm order with Airbus for 23 A320neo and 77 A321neo aircraft. This transaction underscores AerCap’s strategy of investing in the world’s most in-demand, fuel-efficient technology to meet the long-term requirements of its global airline customer base.

“This order for 100 A320neo Family aircraft reflects our strong belief in the long-term demand for these highly efficient aircraft and will help meet the continued demand we see from our customers for both growth and replacement needs,” said Aengus Kelly, CEO of AerCap. “As the world’s largest owner of commercial aircraft, our strategy is clear: we invest in the assets that provide our airline customers with the best economics and the lowest emissions. This landmark transaction ensures that AerCap will continue to lead the industry in fleet modernization well into the next decade.”

“This order is the largest single direct order for the type ever placed by AerCap with Airbus, and is a powerful endorsement of the A320neo Family’s enduring value and market-leading performance,” said Benoît de Saint-Exupéry, Airbus EVP Sales of the Commercial Aircraft business. “We are extremely grateful and proud to support AerCap’s vision in accelerating the global transition towards newer, modern aircraft and more efficient operations.”

The A320 Family is the world’s most popular single-aisle aircraft, having won more than 19,000 orders globally. The Family includes the largest member, the A321neo, offering unparalleled range and performance. The Family offers at least 20% fuel savings and CO₂ reduction compared to previous generation single-aisle aircraft, while maximising passenger comfort with one of the widest single-aisle cabins in the sky.

As with all Airbus aircraft, the A320 Family is able to operate with up to 50% Sustainable Aviation Fuel (SAF). Airbus is targeting to have its aircraft up to 100% SAF capable by 2030.
