

Press Release

JetBlue signs for Skywise Fleet Performance+ solution

Orlando, United States, 21 April 2026 – [Skywise](#), Airbus' recently launched digital services company, announced at MRO Americas that it has signed an agreement with JetBlue to deploy its advanced Skywise Fleet Performance+ (S.FP+) solution. The contract will extend the digital solution capabilities across JetBlue's A320 Family aircraft and its growing A220 fleet, supporting improved aircraft availability and maintenance planning.

As one of Airbus' most advanced digital services, [S.FP+](#) enables airlines to integrate real-time monitoring, accelerated troubleshooting, and enhanced reliability assessments. By leveraging aircraft data and predictive analytics, this platform optimises maintenance scheduling to reduce operational disruptions and ensure consistent, data-driven fleet performance.

"By implementing state-of-the-art technology like Skywise Fleet Performance+, JetBlue is giving our Technical Operations team more advanced tools to monitor aircraft condition and health, respond more quickly, and plan maintenance more effectively," said David Marcontell, Vice President Technical Operations at JetBlue. "That helps us improve fleet dependability, strengthen reliability and operate with an important edge in efficiency and execution."

The JetBlue agreement expands Skywise's presence in North America and reflects growing adoption of digital services across the region. It also marks one of the first customer agreements announced since [the launch of Skywise earlier this month](#), echoing Airbus' ambition to seamlessly continue supporting airline operators with integrated and scalable solutions.

Airbus' [Global Services Forecast](#) for North America, also announced at MRO Americas, highlights connectivity and digital solutions as the fastest-growing segment of the aviation services market over the next two decades, creating valuable solutions for more efficient operations and savings for the industry.

With operations in the U.S., Canada and Colombia, Skywise brings together Airbus expertise in aircraft systems, flight operations, and data analytics to support airline customers globally.
