# Tackling disinformation campaigns

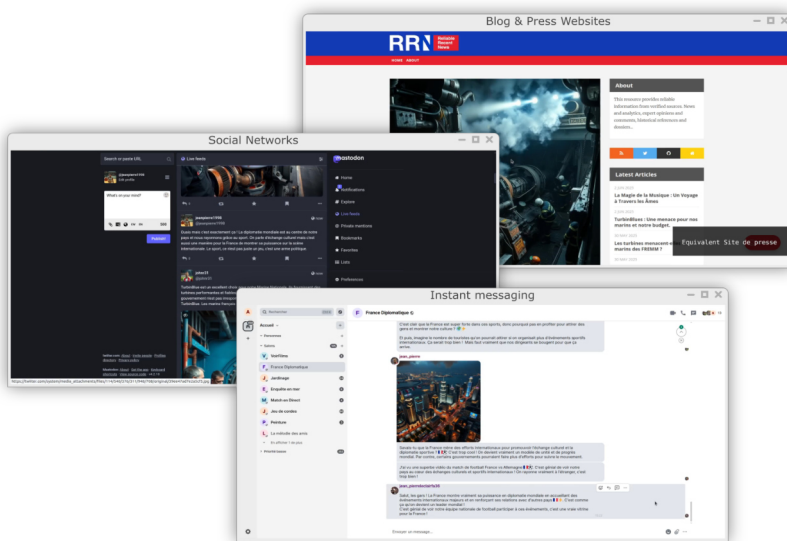

Today's **hybrid warfare** is not only being fought on the battlefield but also on the internet, and particularly on **social media**. Malicious actors are using social networks to spread fake news to destabilise societies and attack democratic stability and values.

Airbus Defence and Space Cyber takes this new threat seriously. We have developed a **training tool** that can create on-demand scenarios and content to **simulate activities and disinformation campaigns on social networks**.

## COGNITIO, A CYBERRANGE MODULE

A training module for Information Warfare that enables the simulation of an infosphere, to improve the capabilities of cyber analysts to **anticipate, identify, and neutralize digital influence campaigns** before they gain momentum.

- Immersive environment
- Powered by **Artificial Intelligence**
  - AI-Driven **mass content creation**
  - AI-Driven **life generation**
- Custom **scenarios in any language**
- Datasets **compliant with GDPR**

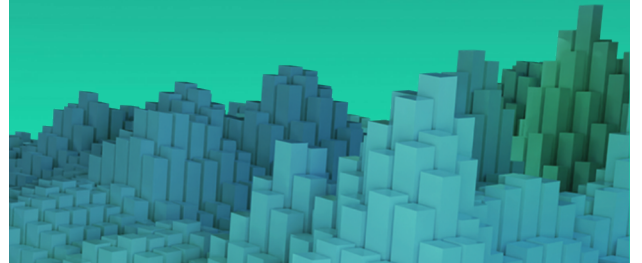

# BOOST YOUR TRAINING WITH COGNITIO

Several customers have been able to benefit from COGNITIO during training exercises as part of a service provision :

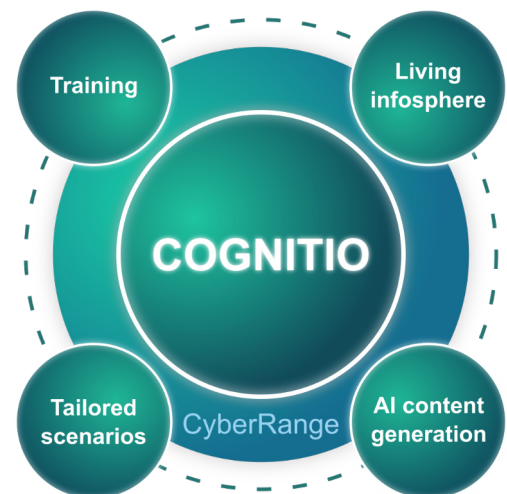

## REAL-TIME TRAFFIC GENERATION

- Per social network:
  - + 2,000 accounts
  - + 80,000 messages
- Per hour:
  - + 1,000 messages
- 2,000 press articles

## ON-DEMAND SCENARIO CREATION

- Creation of **realistic and coherent** scenarios
- Free selection of **narratives** to work with
- Automatic generation of content by using **generative AI**
