Press Release

World2Fly selects Airbus FHS maintenance and logistics services for its A330 & A350 fleet

Madrid, Spain, 23 September 2026 - World2Fly, the Spanish airline focusing on long-haul leisure operations, has signed a long-term Flight Hour Services (FHS) agreement with Airbus. This comprehensive material services contract covers its entire fleet of four A330 and three A350 aircraft.

The FHS-Components contract provides a full suite of material solutions, including standard exchange, component repairs and reliability, and engineering services. To ensure maximum operational availability, the agreement also includes the positioning of on-site stock at World2Fly's main operational base in Madrid.

"At World2Fly, operational reliability and service excellence are fundamental to our business. This agreement with Airbus Flight Hour Services represents another important step in strengthening the efficiency and resilience of our long-haul operations. By partnering with Airbus, we are ensuring our A330 and A350 fleets benefit from world-class technical expertise and support, allowing us to continue delivering the highest standards of safety, reliability and customer experience our passengers expect," said Bruno Claeys, Managing Director of World2Fly.

"By selecting Airbus FHS, World2Fly leverages Airbus' unique expertise to secure its long-range leisure operations. This strategic collaboration is designed to optimise maintenance costs while maintaining the highest standards of fleet performance," said Delphine Gianoglio, Head of Commercial Services Europe, Commercial Aircraft at Airbus. "We are very pleased to welcome World2Fly to our growing operator network and support them in operating their widebody fleet."

This announcement reinforces Airbus's leading position as service provider for the A330 and A350 platforms worldwide. It marks a significant milestone in the continued growth of Airbus's services footprint in the commercial aviation market.

Airbus FHS provides flexible, comprehensive maintenance solutions designed to help airlines maximise fleet performance while minimising total operating costs. Drawing on Airbus' global expertise, advanced digital capabilities and data-driven insights, FHS enhances operational
